PROFESSIONAL SUMMARY

Senior Data Analyst with 4 years of experience translating **customer and behavioral data** into actionable insights, supporting product and growth decisions, and driving measurable business impact. Experienced in solving ambiguous business problems through **experimentation, statistical and predictive modeling, customer analytics, and analytics automation**, with **\$10M+ in quantified business impact**.

TECHNICAL SKILLS

Analytics & Experimentation: A/B Testing, Experiment Design, KPI Design, Measurement, Customer & Behavioral Analytics, Funnel Analysis, Cohort Analysis, Statistical Modeling

Programming & Data: Python, SQL, R, Pandas, NumPy, Scikit-learn

Data & Analytics Tools: Snowflake, Databricks, BigQuery, Power BI, Tableau, Excel, Git

AI & Automation: AI-Assisted Development, Python Automation, Prompt Engineering

EXPERIENCE

Catalina USA

Sep 2022 - Present

Senior Data Analyst

Tech Stack: SQL, Python, Azure Databricks, Git, Power BI

- Led end-to-end **A/B testing** across the customer journey, defining experiment strategies and success metrics with Sales, Ops, and Product teams to uncover customer behavior insights and contribute to **\$10M+ in estimated incremental impact**.
- Owned **digital measurement** for a portfolio of customer-facing products, monitoring performance metrics and refining business logic to identify data discrepancies and dependencies; partnered with Data Science and Product teams to resolve issues and maintain accurate measurement.
- Analyzed **customer and transaction behavior** to identify growth opportunities, translating insights into recommendations that generated **\$50K in incremental revenue at 2.5:1 ROAS** and informed loyalty program optimization.
- Evaluated **propensity modeling** for new-product adoption, assessing model lift and translating model outputs into targeted customer strategies, including **a 4x lift among the top 10% of customers**.
- Built reusable **Python automation pipelines** with AI-assisted development across **80+ data sources**, automating recurring data consolidation and reducing reporting time from **4 hours to under 2 minutes**.

AARON Equipment Company

Aug 2021 - May 2022

Data Analyst (Consulting Project, UIUC MSBA)

Tech Stack: MailChimp, Excel, PowerPoint, Tableau

- Designed and ran A/B experiments to optimize direct-mail strategy, increasing engagement by 20%.
- Built a performance measurement framework across acquisition and retention funnels, standardizing metrics including open rate, click rate, scroll time, and bounce rate.
- Automated company email data collection through web scraping and LinkedIn API integrations, reducing manual maintenance by 5 hours/week and enabling near real-time analytics.
- Built an interactive Tableau dashboard to visualize experiment results in real time, improving visibility and streamlining performance tracking.

EDUCATION

University of Illinois (Urbana-Champaign), Master of Business Analytics

May 2022

Core Coursework: Data Science, Predictive Analytics, Statistical Modeling, Machine Learning
